## A REPUBLIC OF OPPORTUNITY

"We thought we were building a new Ireland these past ten years, an Ireland of the 21st Century. But what the past ten months have shown us is that that has all been on the surface. And we know this because at the first signs of economic trouble, the first people to suffer were the elderly, the young and the disadvantaged. That is not the kind of society that I want to live in.

I don't have any quick-fix answers for you as to how we get ourselves out of the current crisis and back to the type of future that my generation was promised when we graduated from school ten years ago.

But if there is one upside to the financial crisis, it is that the way we do business in our city and in this country – economically, socially, politically – will have to change if we are to recover and prosper as a nation.

And that provides us with a great opportunity. An opportunity to shape this society into the country that we want to live in. Into a society that is both strong and fair. For my generation it is the opportunity to stand up and have our say, to make our voices heard.

It's time for us to take on more responsibility. We've had it easy. Now, tough times lie ahead. And now we have some difficult questions to ask ourselves about the Ireland that we want to live in, and about the difference we can make. What are we going to bring to the table? As a generation, and as individuals?

That's what this is about. It's about a generation getting involved and creating new opportunities. It's about a regeneration of politics in this country – both in terms of people and in terms of ideas.

And that regeneration begins on the ground, in the communities that we live in and the places that we're from. With a stronger community we can look forward to a better city and a fairer society. And, ultimately, a more successful country – a new Ireland for a new age. That is why I am doing this. And that is why I am asking for your support on 5 June. Thank you."
