

## Proposed Pad Locations

SANDYMOUNT STRAND

(A) All pads to be 3000mm long x 1500mm wide x 150mm deep overall with area in centre of pads of approx. 500x500mm having a depth of concrete of 300mm to accept 250mm long rawl bolts.

(B) Pads to be parallel to existing tarmacadam path and set back 1000mm to 2000mm to avoid cable trench, with a concrete ramp approx. 1000mm wide connecting path to pad.

(C) Pads to be level in all directions and finish level with surrounding grass.
